

Design Meeting with Supervisor
Week 4 - 24th/05/2018

Supervisor Meeting

- Discussed technical development progress.
- Agreed on deadline for 28th/05 for all aspects of the kernel to be completed.

Supervisor correspondence:

“ Dear all,

It is simply to confirm what we agreed on yesterday:

*1) we keep a weekly meeting on **Friday 2pm-3pm** in room 1004. (could be cancelled if you do not really feel the need for it. only if necessary)*

*2) you should finish your sub-group tasks (IntelliSense, Syntax Highlighting etc...) by next **Monday 28/05** and test them (**unitary tests**), in order to be able to start the **integration** of the different components together.*

In order to stick to your project planning and deadlines, it is important that your components are tested before the integration. This will save you some precious time and energy during the debugging, later.

As you requested, we can meet before your next meeting with the client (Wednesday morning, 11am for example?).

@Mwana: please check with your group mates, and confirm it or propose another timeslot.

(By the way, I hope to meet ALL of the 7 group members next time, unlike yesterday and last week.)

Meanwhile, I will have a look from time to time at your growing GitHub repository. You still have some codes of line to write and some bugs to fix, I know, but you can do it, you are almost there.

A good news for you 😊: <https://www.bbc.co.uk/weather/2643743>

*Best regards,
Sahbi “*
